Re: Request for Water Quality Data for the Upper and Lower Colorado River Basins Triennial Review

The Colorado Department of Public Health and Environment, Water Quality Control Division (Division) is asking for your assistance in preparing for the triennial review of the Upper and Lower Colorado River basins water quality classifications and standards. This effort requires the compilation of recent water quality parameters including biological, physical, chemical, and other related data collected throughout the river basins. This compilation of data from streams, lakes, and reservoirs will be the basis of the Division's recommendations to the Water Quality Control Commission (WQCC) for maintaining or modifying water quality classifications and standards in the Upper and Lower Colorado River basins.

The schedule for the review of WQCC Regulation No. 33 Upper Colorado River basins and Regulation No. 37 Lower Colorado River Basins and subsequent rulemaking is as follows:

Regulation Nos. 33 and 37 Issues Formulation Hearing	November 4, 2013*
Regulation Nos. 33 and 37 Rulemaking Notice and Proposal	January 15, 2014*
Regulation Nos. 33 and 37 Rulemaking Hearing	June 9 - 10, 2014*

* dates are approximate

The Division collected data in the Upper and Lower Colorado River basins in 2011 and 2012 and recognizes that other parties may have water quality data that would be appropriate to include in the data analyses for the triennial review process. A list of the Division's monitoring sites is available upon request. In addition, there are numerous stream segments the Division was unable to sample and third party data may fill these data gaps.

Therefore, the Division is requesting water quality data from any sampling events conducted in these basins during the last ten years. There is no need to resubmit data previously submitted to the Environmental Data Unit. However, data previously submitted to other areas within the Division should be resubmitted in order to ensure it is used in this assessment process. The data will assist in determining ambient water quality across the state during this time period.

The data should follow the credible evidence guidelines used in the compilation of previous 303(d) lists. The guidelines are:

1. Information to describe the methods used for sample collection and field measurements or laboratory analysis.
2. Sufficient information and data to indicate that the measurement represents existing conditions.
3. In general, the Division assesses data from the most recent five year period of record. Older data may be used on a case-by-case basis if the Division believes conditions have not changed and this older data is still representative or the older data is used with newer data to determine trends.

4. Physical and biological assessments performed by an observer who has training and experience in performing such observations, and recorded observations adequately account for seasonal variation.

The Division requests sampling data for all parameters and analytical techniques. However, parameters of particular interest are listed below. Parameter data should be accompanied by site location (latitude/longitude and datum, descriptive information, and/or a map) and date and time of the sampling event. See example submission format for specific details.

Parameters of Interest

- Flow Rate
- pH
- Water Temperature
- Dissolved Oxygen
- Specific Conductivity
- Arsenic (dissolved and total recoverable)
- Cadmium (dissolved)
- Chromium III and VI
- Copper (dissolved)
- Iron (dissolved and total recoverable)
- Lead (dissolved)
- Manganese (dissolved)
- Mercury (total)
- Nickel (dissolved)
- Selenium (dissolved)
- Silver (dissolved)
- Zinc (dissolved)
- Ammonia (un-ionized and total with accompanying pH and temperature)
- Hardness (total as CaCO₃)
- Nitrite
- Nitrate
- Total Nitrogen
- Kjeldahl Nitrogen
- Total Phosphorous
- Sulfate
- *E. Coli* (per 100 ml)
- Aquatic life data (fish, macroinvertebrates, algae, macrophytes)
- Periphyton data
- Aquatic life habitat data
- Fish tissue residue data
- Organic chemicals and/or pesticides

Additional Parameters of Interest for Lakes & Reservoirs

- Depth profiles including pH, temperature and dissolved oxygen
- Secchi depth
- Chlorophyll *a*

The water quality data should be provided in electronic format, including the associated meta-data, detection limits and information explaining that the samples were collected and analyzed according to established quality assurance procedures. An example of the acceptable data formats is available on the WQCD web page under the heading *How do I get/submit data?* (<http://www.colorado.gov/cs/Satellite/CDPHE-WQ/CBON/1251596876811>). An agency contact person and telephone number should also be provided. **Data must be submitted to Arne Sjodin (arne.sjodin@state.co.us) with “2014 Rulemaking Hearings Data” in the subject line of the email.** Data must be received by **April 1, 2013**. Data received after this date will not be reviewed and incorporated into the Division’s proposals for Regulation Nos. 33 and 37 rulemaking hearings in 2014. All information collected by the Division will be available for public review and use after the Division’s Pre-Hearing Statements are submitted.

For more information or any questions please contact Robert Hillegas (303-692-3137, robert.hillegas@state.co.us), John Hranac (303-692-3586, john.hranac@state.co.us), Rebecca Anthony (303-692-3339, rebecca.anthony@state.co.us), Christy Pickens (303-692-3584, christy.pickens@state.co.us), Arne Sjodin (303-692-3522, arne.sjodin@state.co.us), or Sarah Wheeler (303-692-3436, sarah.wheeler@state.co.us) of the Environmental Data Unit.

The Division uses email distribution lists from the WQCC Office. Please contact the WQCC office at <http://www.cdphe.state.co.us/op/wqcc/> or 303-692-3463 if you would like to be removed, or know of any individuals or organizations that should be added.

Sincerely,

Aimee Konowal
Environmental Data Unit Manager
Water Quality Control Division
